sentence

- **ends your paragraph smoothly.**

Concluding sentence

- A. Last Detail
- B. Topic Sentence
- C. Summary
- D. Opinion
- E. Advice/Hope
- F. Prediction

Study the following paragraph. Identify the concluding sentence.

Confusion about the difference between the World Wide Web which is known as the Web and the Internet has arisen because the Web has become extremely popular and currently accounts for the majority of Internet traffic. The difference between the Internet and the Web is sort of like the difference between highways and a delivery service. The Internet is like a system of highways. Information traffic from the Web travels over the Internet. On the other hand, the Web is like a delivery service. Delivery service trucks use highways to move packages from one place to another. All in all, these illustrations show the differences between the Internet and the Web.

Summary

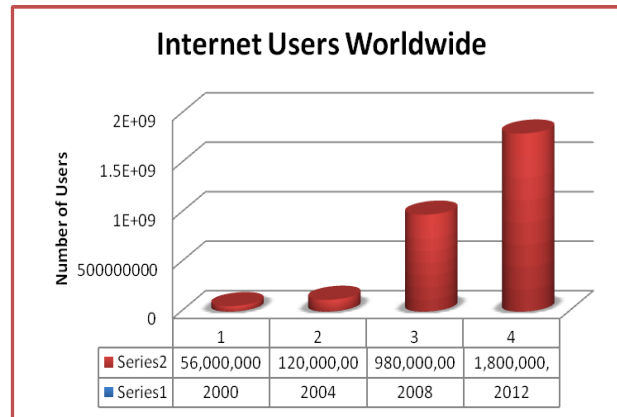

Study the following paragraph. Identify the concluding sentence.

The number of people visiting websites on the Internet has drastically increased over time. The first world-wide-*web software* was created by Tim Berners-Lee in 1990. It was then released to the public in 1991. By then, the number of internet hosts had grown to more than 600,000 as web browsers took off. In 1992, there were over a million computers connected to the internet. This doubled to over two million in 1993, the same year in which the White House and United Nations were connected. By 1994, the number of internet hosts grew to more than three million and the web grew by more than 341,000 per cent. In 1995 Microsoft launched Microsoft Internet Explorer to compete against Netscape while Sun Microsystems launched Java. The term internet was defined for the first time, while the number of internet hosts grew to more than four million.
