Note:

Power distance is a term that describes how people belonging to a specific culture view power relationships - superior/subordinate relationships - between people, including the degree that people not in power accept that power is spread unequally.

Individuals in cultures demonstrating a **high power distance** are very deferential to figures of authority and generally accept an unequal distribution of power, while individuals in cultures demonstrating a **low power distance** readily question authority and expect to participate in decisions that affect them.
